Preparation disclosure

Manuscript: Conjectures of Ashoke Sen: Scope, Exact Tests and Analytic Limits.
Author: Deep Bhattacharjee.

This is a self-prepared disclosure for author review. It is not an official APS form and contains no author signature or approval.

The supplied manuscript was revised using ChatGPT/Codex (OpenAI; session dated October 26, 2026) for source comparison, proof development, exact computations, Lean checks, code-generated figures and editing. The exact backend model identifier is not independently recorded. No system is listed as an author.

Checks and limits are recorded in the formal-scope report and provenance file. Finite coefficient verification, the exact Python scan and elementary analytic identities have separate scopes. Physical interpretations, the literature catalogue, full PDE formalisation and nonperturbative closure are not certified by these finite checks.

The author must review the revised mathematics, citations, graphics and interpretation, confirm the accuracy of this disclosure, and complete the current journal's required declarations before submission. A full human-understanding or exclusive-submission declaration is not asserted on the author's behalf.
